### Step 1

Locate and remove the cartridge clip on both sides of the cartridge using a small thin flat screwdriver. Gently pry up on the clip until it pops up then pry the other end away from the cartridge gently while working the clip up and down.

(See Photo 1a and 1b)

**NOTE:** It is very likely that these clips will break while they are being removed. If these break, replace with an after-market part. You may need to re-use the springs from the OEM clip.
